HIPPO SQUARE BAG LEVEL 1

Inflates in approximately 1 minute

Hippo Square Airbags

Simplified loading

Covers more surface area

PRODUCT INFORMATION

The HIPPO square airbag was designed and created to serve as the primary function of bracing products with a void space greater than 12 inches wide. The HIPPO bag touches more product area, bracing loads without the need for additional dunnage material. Made with moisture resistant material, and an extremely durable outershell, the HIPPO square bag is also AAR verified for F2 associated method.

For many years, the practice has been to use corrugated dunnage to reduce the void space to twelve (12) inches or less; however, as times change more companies look for ways to streamline their loading practices. Compatible with our Turbo Flow inflation systems, the HIPPO fills in approximately 1 minute, significantly reducing load time.

STOCK SIZES AVAILABLE

Sizes	Box Qty
17x24x96	150
17x36x96	130
17x48x48	140
17x48x60	140
